

Techceram Duplicating Silicone-Liquid

TECHSIL-LIQUID

Techsil-Liquid is a pourable, two part (A+B), addition-type curing, silicone duplicating material. It has low viscosity making pouring up a simple operation. The superior mechanical and compositional properties of the product yield high tear resistance, and extremely accurate detail reproduction and a very low shrinkage.

Properties

Mixing Ratio : A/B	1:1
Colour : Component A/B	Yellow/Blue
Colour : Silicone Model	Green
Mixing Time (Sec.)	60
Working Time (Min.)	6
Set Time (Min.)	30
Shore A Hardness (35min/24hr)	18/21
Viscosity (M Pa.s)	3500 \pm 500
Shrinkage (%)	< 0.1

Product Details

The following table shows the prices which Techsil-Liquid is offered to Dental Laboratories.

There are two plastic bottles part A (1kg) and part B (1kg)

Carriage is free for **3 day** delivery.

A next-day delivery service can be arranged, but this attracts a surcharge: please call for further information.

No. of Bottles	Price
1 ea. A+B	£60.84
