Techceram's ACE Group Expands To 64

Techceram Ltd are delighted to announce that there are now 64 Members in their ACE Group of Laboratories; each dedicated to delivering Ultimate Aesthetic Restorations to Dentists and patients throughout the UK and Ireland through their commitment to Techceram's ACE "All-Ceramic Excellence" Concept.

The ACE "All-Ceramic Excellence" Concept is a patient centred "Quality Controlled Network Loop" which promotes maintenance of and continuous improvement in quality, by means of Techceram's unique Quality Feedback Card System. It also promotes teamwork between the Dental Practice, the ACE Dental Laboratory and the substructure Manufacturer (TTC - Techceram's in-house Dental Laboratory), enabling Techceram to offer a Five Year Guarantee, conditional on the Clinician following the recommended clinical procedure and returning Techceram's Quality Feedback Cards.

This means that in association with their ACE Group of Laboratories, TTC can offer Dentists and patients the highest quality all-ceramic restorations currently available in the UK. This enables them to offer a complete choice of all-ceramic restorations including Techceram flame sprayed alumina single unit restorations, Lava Zirconia based substructures and IPS e.max ZirCAD and Press ceramic precision fitting inlays, veneer and crown restorations. Whichever option you choose, being all-ceramic systems, they eliminate the aesthetic problems traditionally associated with non-precious metal based restorations. They are also more biocompatible with gingival tissue in the longer term.
