Ashley Latter At Inaugural ACE Group Seminar

Techceram Ltd hosted an Evening Seminar with Ashley Latter for members of their expanded ACE (All-Ceramic Excellence) Group of Laboratories on Tuesday 13th February. In line with the ACE network concept, Ashley provided an insight on how laboratories can promote better relationships with their Dentists, especially in the critically sensitive area of pricing work/services.

Techceram believe that their ACE Concept is ideal for promoting effective teamwork between the Dental Practice, Laboratory and substructure Manufacturer, focusing on the best interests of the patient.

The ACE Concept is a patient centred “Quality Controlled Network Loop” which promotes maintenance and continuous improvement in quality by means of a unique Quality Feedback Card System. It also enables Techceram to offer a Five Year Guarantee, conditional on the Clinician following the recommended clinical procedure and returning Techceram’s Quality Feedback Cards.

This means that in association with their ACE Group of Laboratories, TTC can offer Dentists and patients a complete choice of all-ceramic solutions including Techceram alumina single unit, and Lava or Cercon precision fitting, milled zirconia multiple and single unit restorations.
