

# Techceram Ltd

## Who'll back you up if your restorations fail?

In this increasingly more litigious environment, if something goes wrong everyone looks for someone else to blame! So, when it comes to your all-ceramic restorations, who is standing behind you?

Techceram Ltd only supply top brand-named all-ceramic restorative solutions from major manufacturers including Ivoclar Vivadent and 3M Espe. Therefore, if there is ever a problem they have direct traceability and can get it sorted out without any hassle or fuss.

Techceram Ltd can provide :-

- Lava Zirconia based substructures for single & multiple unit restorations
- IPS e.max ZirCAD Zirconia based substructures for single & multiple unit restorations
- IPS e.max Press/CAD Glass ceramic precision fitting inlay, veneer and crown substructures/restorations.
- In-Ceram CAD Alumina & Spinell substructures for PJC alternative single unit restorations

All of these all-ceramic restorations are available with a Five Year Guarantee, conditional on the Clinician following the recommended clinical procedure and participating within their unique "Quality Feedback Network".

Whichever option you choose, being all-ceramic systems, they eliminate the aesthetic problems traditionally associated with non-precious metal based restorations. They are also more biocompatible with gingival tissue in the longer term.
